

ΕΡΓΑΣΙΕΣ για την ΑΝΑΠΤΥΞΙΑΚΗ ΦΥΣΙΟΛΟΓΙΑ ΦΥΤΩΝ

(δηλώσεις το συντομότερο στον Κ. Θάνο)

1. The Genetics of Seed Dormancy in *Arabidopsis thaliana*, chapter 25 in *Dormancy in Plants* M. Koornneef, C. Alonso-Blanco, L. Bentsink, H. Blankestijn-de Vries, I. Debeaujon, C.J. Hanhart, K.M. Léon-Kloosterziel, A.J.M. Peeters and V. Raz, 10 pp
2. Growth Cycle and Dormancy in Plants, chapter 1 in *Dormancy in Plants*, H. Okubo, 22 pp, 2000 (2 άτομα).
3. Light: an indicator of time and place, Neff et al., *Genes & Development* 2000 (2 άτομα).
4. Phytochromes and light signal perception, Smith, *Nature* 407, 585-591, 2000
5. Ethylene in seed formation and germination, Matilla A.J., *Seed Science Research* 10, 111-126, 2000.
6. Photoreceptors in Plant Photomorphogenesis to Date. Five Phytochromes, Two Cryptochromes, One Phototropin, and One Superchrome, Briggs & Olney, *Plant Physiology*, January 2001, Vol. 125, pp. 85–88.
7. Evolutionary and ecological aspects of recalcitrant seed biology, Pammenter N.W. Berjak P., *Seed Science Research* 10, 301-306, 2000.
8. Developmental arrest: from sea urchins to seeds, Footitt and Cohn, *Seed Science Research* 11, 3-16, 2001.
9. Phototropism: A “Simple” Physiological Response Modulated by Multiple Interacting Photosensory-response Pathways, Liscum and Evans, *Photochemistry and Photobiology*, 2000, 72(3): 273–282.
10. Phytochromes, Cryptochromes, Phototropin: Photoreceptor Interactions in Plants, Jorge J. Casal, *Photochemistry and Photobiology*, 2000, 71(1): 1–11.
11. Aspects of seasonality. Battey, *J. Exp. Bot.*, 51, 1769-1780, 2000.
12. Red light sensing in plants, Genick and Chory, *Current Biology* 2000, 10:651-654.
13. Seed dormancy and germination, Koornneef et al., *Current Opinion in Plant Biology* 2002, 5:33–36.
14. Molecular control and variation in the floral transition, Battey and Tooke, *Current Opinion in Plant Biology* 2002, 5:62–68.
15. Photoreceptors and Regulation of Flowering Time, Lin, *Plant Physiology*, May 2000, Vol. 123, pp. 39–50.
16. Time for Plants. *Progress in Plant Chronobiology*, Golden and Strayer, *Plant Physiology*, January 2001, Vol. 125, pp. 98–101.
17. The circadian clocks of plants and cyanobacteria Kondo and Ishiura, *Trends in Plant Science*, 4, 171-176, 1999.
18. Gibberellin and abscisic acid signalling in aleurone, Lovegrove and Hooley, *Trends in Plant Science*, 5, 102-110, 2000.
19. Polar auxin transport: controlling where and how much, Muday and DeLong, *Trends in Plant Science*, 6, 535-542, 2001.
20. 2001: A plant space odyssey, Stankovic, *Trends in Plant Science*, 6, 591-593, 2001.
21. Seeds in space, Musgrave, *Seed Science Research*, 12, 1-17, 2002.
22. Gene Banks, Linington & Pritchard, *Encyclopedia of Biodiversity*, Vol. 3, 165-181, 2001.
