OPEN SOURCE

XFCE | xfce4-terminal Maintainer + Thunar Developer
Ongoing | Remote
- I am the maintainer of xfce4-terminal.
- I have made dozens of contributions to Thunar (**Merge Requests**).
- Notably, I've worked on revamping the search functionality of Thunar, including the introduction of a fast, asynchronous recursive search algorithm.
- I've also implemented the #SHARED part of the freedesktop.org thumbnail spec, making Thunar one of the first file managers to support Shared Thumbnail Repositories.
- Many more improvements and fixes.

MUSESCORE | Open Source Contributor
March 2019 - March 2021 | Remote
- I have made dozens of contributions to MuseScore (**Merge Requests**).
- Implemented a massively improved Albums feature as part of Google Summer of Code 2020.
- Introduced the smooth-pan playback mode.
- Fixed long-standing Text Editing bugs that plagued MuseScore for years.
- Massively sped up (by an order of magnitude) the Preferences Dialog and made the addition of new Preferences trivial.
- Many more improvements and fixes.
